

771-STEP SAUSAGE

Advanced Polymer Wood Flooring Adhesive

- Usable in Glue Assist Applications
- Weather-Resistant Packaging
- Easy to Open
- Extrudes Easily
- 6 Nozzles Per Case

FEATURES AND BENEFITS

- Provides additional strength reinforcement in nail down traffic areas
- Good for repairs and small installations
- Perfect alternative to face nailing, closeout rows, board replacements, trim and stair treads
- Packaging can be recycled, reducing landfill waste
- Won't cause dimensional changes in wood
- FloorScore® certified by SCS

Titebond® 771-Step Adhesive, Moisture & Sound Control is now available in sausage packs. Sausage packs save time, money and are more environmentally responsible. They are ideal for flooring repairs and small installations that don't require a full pail of adhesive. Air-tight packaging helps to extend the adhesive shelf life up to two years. Sausage packs allow for the adhesive to be troweled or spread. They increase yield, reduce waste, and can be recycled. For precise control and handling, sausage packs can be used with a gun delivery system, available with various nozzles for application in tight areas.
